

ZALLAF LIBYA EXPLORATION AND PRODUCTION OIL AND GAS COMPANY

PRE-QUALIFICATION INVITATION FOR PROVISION OF SLICKLINE SERVICES AT ERAWIN FIELD (NC200)

Zallaf Libya Exploration & Production of Oil & Gas Company referred to as ("Zallaf"), Operator of Erawin Field block NC-200 located in Murzuq basin, is conducting a pre-qualification process for selecting contractor(s) for its Slickline Services to support well completion installations as part of the plan for the Erawin fields and expansion drilling campaign and with routine & ad-hoc general field-life well intervention operations to enhance the productivity of wells. The Contractor shall provide appropriate specialist personnel, equipment & services to undertake the work as instructed by Zallaf.

Location:

Onshore Erawin Field (NC200) block located in Libyan Murzuq Basin, about 800 km southwest of Tripoli.

1- Project Main Objectives

Zallaf, Operator of Erawin Field NC200 block in Murzuq basin is scouting and pre-qualifying Libyan and international market for providing Slickline Services will be required for the abandoned current wells that will be support production. Routine well maintenance, data collection and ad-hoc operations will include, but not be limited to Bottom Hole Pressure (BHP) surveys, collecting bottom hole fluid samples, gyro surveys, memory PLT surveys, well calliper, fishing, bailing and gauge ring runs.

At present, the expected operations start-up date is Q4-2018. **Zallaf's** aim is to maintain the same Slickline contractor(s) for the life span of Erawin field. Hence, annual contracts will be automatically renewed upon satisfactory contractor(s) performance.

All Slickline services Contractors dully registered in Libya are invited to participate in this prequalification process by submitting the information requested hereinafter no later than four weeks (28) days from the date of this publication. Upon approval of **Zallaf** governance bodies, it is planned to issue an Invitation to Tender in **November 2018**.

2- Scope of Work

The scope of work defined here below perceived to be an exhaustive description of Contractor's Slickline Services, equipment and personnel to support routine and completion running. Completion operations will involve running and pulling test plugs and drifting final completions. The Contractor should be able to provide on dedicating and call out services as per field development requirements demand and will need to supply plugs and drifts for the types of profile, including any associated running and pulling tools.

2.1. Technical Data Section:

- The maximum reservoir temperature °F200 and maximum pressure 2000 psi.
- The maximum total depth for NC-200 oil wells is +/- 4500 ft. with 9 5/8" casing and 3 1/2" tubing.

The following list represents a recommended minimum Slickline tool list. Tenderers will be required to submit their full tool list in the Technical Bid for Slick line services but, this will demonstrate what **Zallaf** Operations employ on a regular basis.

- Vehicles
- Surface Equipment
- Tool String
- Tubing Control
- Pulling / Running Tools
- Bailing Equipment
- Fishing Equipment
- Hand Tools

2.2. Gauge Guidelines:

Zallaf utilizes Quartz Memory Gauge for the following purposes:

- Long-term field monitoring (6-12 months in wellbore)
- Production Testing (8 hours to 1000 hours in wellbore)
- Static BHP / BHT surveys (Slim Hole gauges or Standard Gauges)
- Flowing gradient surveys
- Bottom Hole Pressure/Temperature measurements while conducting stimulation operations.

3- Prequalification Requirements

Zallaf invites all interested local and international well services Contractors duly registered in Libya, in addition to the information requested above, to submit the complete prequalification document package, for registration and evaluation, as described here below.
